

Model Number	Description	Cost
EX-80LT	Revolving door with Metal Detector in Diagonal line	\$ 22,485.00

Cylinder 2008 has an internal metal detection system in diagonal line, which reduces the improper door connection drastically. It eliminates definitively the detection of the users who leave the agency carrying their metallic objects that had been introduced in the agency entrance through the pass-thru drawer. This product was designed with top technology that warrants excellent performance. The use of modern solutions and materials (ex.: metal detector in cylindrical shape and curved glasses) results in a product with exquisite design and extremely compact dimensions.
